

I absolutely LOVE XM Satellite Radio and everything it has to offer that including the traffic and weather channels!!!! You just cannot get the information any other place that XM Satellite Radio can give you. I do not know what I did without it. I live in a rural area and radio stations are very hard to get out here so I need my XM Satellite Radio. I believe in this product and everything it has to offer. It is definately an asset for the public. PLEASE REJECT the NAB's petition 04-160 and support XM Satellite Radio. If you listen just one time, you will know the quality it provides. It is a great product.

Thank you,
Kelly Wolfe
XM Radio Forever!
